

Frontend Engineering Internship at Mycroft (paid)

We're seeking a creative and detail-oriented Frontend Engineering Intern to help craft exceptional user interfaces. You'll work with modern web technologies while making thoughtful design decisions that enhance user experience.

What You'll Do

- Build responsive and intuitive user interfaces
- Work with modern JavaScript frameworks
- Collaborate on design decisions and implementation
- Iterate quickly based on feedback
- Transform design concepts into functional interfaces

What You'll Need

- Proficiency in HTML, CSS, and JavaScript
- Experience with React or Angular
- Eye for design and user experience
- Strong collaborative spirit
- Ability to iterate quickly on feedback

How to Apply

1. Choose a project you've contributed to (could be open source, academic, or personal)
2. Write one page about the project, focusing on:
 - Project overview
 - Your specific contributions
 - Technical challenges faced and overcome
 - Impact of your work
3. Email to prasanna@mycroft.in with:
 - Subject line: "Frontend Engineering Internship Application"
 - Your one-page write-up
 - Link to relevant code repository or pull request

Join us in creating beautiful, functional interfaces at Mycroft!
